SUBJECT: Operation Report for Quarterly Period Ending 31 October 1966 (RCS CSFOR-65)

TO:

Commanding Officer 68th Medical Group APO 96491

SECTION I

SIGNIFICANT ORGANIZATION OR UNIT ACTIVITIES

At the end of the last report period, only a few concrete pads had been poured and the frame of one building erected. At the end of this report period a total of thirty-two (32) concrete pads have been completed. These include twenty-six (26) for quonsets, five (5) for nurses quarters, and one (1) for mess hall. Of the twenty-six (26) quonsets which will compose the hospital proper, eighteen (18) are structurally complete, three (3) are partially complete, and five (5) have only the frame erected. This is being partially accomplished by a detail of twenty-four (24) men from this unit, who are working under the supervision of the engineers. The painting of these buildings, both interior and exterior, is also being accomplished by men of this unit, in addition to building counters and shelves within the quonsets.

Of the five (5) nurses' quarters, one (1) is complete and a second partially completed. The mess hall has the structural members in place and it is partially roofed.

Pacific Architects and Engineers have started their Repair and Utilities Section. Their building is complete and two large generators have been received, but are not yet operational.

Under a self-help program, the permanent billeting area was prepared by pouring concrete floors for all tents, and then framing them.

During the ninety-two (92) days of the report period, some personnel were training every day. This training included that held within the unit and on-the-job training at functioning hospitals for up to thirty-seven (37) men. This figure does not include professional personnel from which all but two were performing duty with other units.

Inclosure 1

AVCA MB-GL-EC 9 November 1966 SUBJECT: Operation Report for Quarterly Period Ending 31 October 1966 (RCS CSFCR-65)

There were no troop movements or operations during this report period.

On 1 September, LTC A.C. Donohoo, Commanding Officer 24th Evacuation Hospital, departed for reassignment to the 85th Evacuation Hospital. On the afternoon of 1 September, LTC John R. Connolly arrived and asummed command of the 24th Evacuation Hospital.

This unit was assigned the mission of staging the 12th Evacuation Hospital. Their advance party arrived on 9 September and their main body on 18 September. This function gradually diminished as portions of the 12th Evacuation Hospital were moved to Cu Chi. At present only five (5) men from the 12th still remain here.

The area physically occupied by the hospital has gradually expanded to its permanent boundaries. The entire area is now surrounded by triple strand conserting wire, and seven (7) guard bunkers are spaced around the perimeter. There are eight (8) permanent forty (40) men bunkers now complete. There is a complete communications system established between all bunkers for alert purposes.

On 12 October a Command Medical Maintenance Inspection was held. This hospital received a Satisfactory rating with scores running from 92 to 100 on the various phases.

On 22 October, CINCPACFIT Staff Medical Officer, Rear Admiral Cowan, and Colonal J.E. Haggerty, CINCPAC J76 PIO Officer, made a visit to the hospital area.

Throughout the report period, this hospital has been called upon to assist other units with men and equipment, mainly the 93d Evacuation hospital. In addition to providing medical personnel and equipment this hospital's entire laundry section including personnel and equipment is being utilized by the 93d Evacuation Hospital.

There is also a detail engaged in sodding portions of the hospital area in an effort to control dust.

During this report period this unit has achieved and maintained a ninety (90%) percent level of participation in the Saving Bond Program thereby earning the Minute Man Award.

SECTION II

OBSERVATION (LESSONS LEARNED)

Item: Priorities of work by Engineer Battalion
Inclosure 1 2

AVCA MB-GD-EC 9 November 1966 SUBJECT: Operation Report for Quarterly Period Ending 31 October 1966 (RCS CSFOR-65)

Discussions: In building an Evacuation Hospital it is believed that certain priorities for the completion of buildings should be adhered to. The mass hall, showers, and latrines should be the first buildings to be constructed since almost the entire hospital staff is on site from the first day the building program begins. Other priorities are as listed below.

PRIORITY	FACILITY		
1 2 3 4 5	Mess Hall Showers & Latrines Receiving Building (A & D) X-Ray and Lab Pre-Op		
6 7	Surgical Buildings C M S		
ė	Three Post Op Wards		
9 10)	Two Nurses Quarters Registrar and Baggage Room		
11	Headquarters Building		
12	Three Intensive Care Buildings		

The remainder of the hospital buildings, i.e. wards, dispensary, pharmacy, etc., may be completed in any order and require no priority listing.

Observation: Upon completion of the foregoing buildings, a small one hundred twenty (120) bed hospital (3 post Op and 3 I. C., wards) could become operational. Gradually additional ward buildings and other ancillary services could be provided, until a complete four hundred (400) bed Evacuation Hospital was in operation.

SECTION II

Part 2

RECOMMENDATIONS

That, in the future, the engineers be given definite work priorities to follow in order to expedite the initial completion of such a hospital on a reduced scale.

JOHN R. CONNOLLY

LTC, MC

Commanding

Inclosure 1

AVCA MB-GD-PO (9 Nov 66) 1st Ind SUBJECT: Operational Report for Quarterly Period Ending 31 October 1966 (RCS CSFOR-65)

HEADQUARTERS, 68th Medical Group, APO 96491 16 November 1966

TO: Commanding Officer, 44th Medical Brigade, APO 96307

- 1. Engineers are given definite work priorities to follow in constructing buildings of a hospital. Priorities for construction of buildings are normally made in coordination between the unit commander, the Engineer unit responsible for the construction, and this headquarters.
- 2. The objective of all construction priorities is to get the hospital operational as soon as possible.

AVCA-RB-PC (9 Nov 66) Sund Ind SUBJECT: Operational Report for Quarterly Period Lading 81 October 1986 (RCS 08703-65)

HEADQUARTERS, 44th Medical Brigade, APC 20007, 20 November 1263

- TO: Commanding Coneral, 1st Logistical Command, AUGH: AVGA-GO-C, AFC 96507
- 1. The 24th Evacuation Mospital was not operational uring this apport period.
- 2. Reference Section II, Part I, basic report. The priorities listed will reduce the duplicative workload for the hospital unit, thereby eliminating the temporary requirements for a mess in tents and the construction of temporary latrices and showers. The labor effort can be utilized in constructing male quarters, completing the inside of the mass ball and assisting the engineers in completion of the hospital.
- 3. Concur with recommendation of the hospital community and with the community contained in the 1st Indersement.
